

invisiron®
sentry S-1000

invisiron® sentry S-1000

Great Value for Small Businesses

Invisiron® Sentry S-1000 boasts a compact form-factor designed for small networks. The perfect solution for Small Businesses.

Key Features

Automatic Threat Mitigation

Invisiron® offers a pro-active Cyber Defence platform with auto threat mitigation.

Advanced Threat Protection

Our device protects your organisation against advanced persistent threats and many other attacks and malware.

Cyber Threat Intelligence (Invisiron-CTI™)

Invisiron-CTI™ comes from over 30 globally validated sources, which are updated and pushed down to every Invisiron® device every hour, automatically.

Threat Commander Remote Monitoring Utility

Every malicious packet that is mitigated by Invisiron® can be reviewed in our Remote Monitoring System and allows our Managed Detection and Response (MDR) teams to perform forensics on compromised assets.

Bi-Directional Deep Packet Inspection (DPI)

Our powerful DPI engine is capable of inspecting a packet down to a single byte level for both incoming and outgoing Internet traffic.

Invisible Stealth Mode

Invisiron® devices do not require a MAC or IP address to operate. Hackers will not be able to detect the presence of an Invisiron device in a network.

Ultra-Fast In-Line Packet Processing Speed

Packets are processed at near line speed without degradation of your Internet bandwidth.

No Changes to Existing Network Infrastructure

A plug-and-play complete Cyber Defence solution, without having the need to make any changes to existing IT infrastructure networks.

Geo IP Blocking

Invisiron® devices are able to block network connections based on geographical locations and countries.

LAN IP Isolation

Proactively isolates suspicious LAN IPs using a machine learning algorithm.

Mobile App

The Invisiron® Mobile App offers a convenient way to check device health status and cyber posture, real-time, on the go.

Designed for
Small Businesses

Technical Specifications

Processor	Intel Celeron Quad Core
Memory	2 GB DDR3 memory
Disk Drives	120 GB SSD MSATA
Packet Processing	2x Intel 82583V GB Ethernet Ports (RJ45)
Management	1GB Ethernet (RJ45) for Management
Power and Cooling	12 volt DC external adapter, 2x System Fans, low noise
Form Factor	197mm x 174mm x 35mm
Embedded OS	Linux
Cyber Threat Intelligence	Cloud-based Invisiron-CTI™
DPI Rules	Up to 1,000 rules
Reputation Detection	Up to 1,500,000 domain names and URLs
IP Address Filtering	Up to 250,000 IP addresses, both IPv4 and IPv6
DGA Detection	Supported on DNS queries and replies
Configuration	Graphical User Interface over encrypted link
Alerts and Notifications	By graphical user interface, emails and mobile phone application
Evidence Collection	PCAP data format
System Upgrades	Software updates provided from the cloud
